

Social “Eyes”

Small language groups are offered for children 8-years and up, who have difficulty with social interaction.

Groups meet one time per week for one hour with a speech-language pathologist and 4-5 children.

The groups focus on improving social skills needed to succeed in everyday interaction with others through a variety of problem solving and group games and activities.

Parents are able to observe and are offered suggestions for home carryover.

Columbus Speech & Hearing Center
